

# TWO COMPONENT PAINT SYSTEMS

## About Patvin

Patvin is a leading supplier of Turnkey systems for spray finishing, paint circulation, sealant, adhesives and lubricant dispensing to global markets and diverse industries.

A proven track record of more than 30 years, innovative designs, cost-effective solutions and superior customer service have helped us emerge as a partner of choice to our customers.

## Accurate ratio assurance for superior finish quality

Patvin has for many years delivered both manual and automatic 2K painting systems to the surface treatment industry. With intrinsically safe fluid panels, the systems easily integrates into hazardous areas, single or multi-color and catalysts.

The systems deliver a superior finish quality with an accurate ratio assurance. Simple programming allows fast set up and efficiency. Process control Advanced web interface provides consolidated system management and reporting. The systems come with a potlife alarm and optional autoflush features, material consumption data & statistical process data.

Our solutions include a wide range of ProMix 2KS Proportioners and Promix PD2K Proportioners.

### ProMix 2KS Proportioners

Electronic Plural Component Proportioning Systems for a broad range of solventborne, waterborne, & acid catalyzed materials

### ProMix PD2K Proportioners

Positive Displacement Proportioning System  
100% Positive Displacement Technology for accurate mix ratios and consistent performance

## System Options

- Flow Meters - Spur Gear, Helical Gear, Non-Intrusive Coriolis Meters.
- Gun Flush Box - Automated Flushing for Manual Spray Guns.
- Integrated Flow Control - Produces quick responses & superior process control.
- Communication Gateway - Offers integration flexibility with multiple protocol capabilities on Auto & Manual Systems.
